

Material you should be familiar with for the aquaria part of the exam.

1. Know the appropriate levels for each factor in this chart.

Factor	MARINE
SUBSTRATE	Crushed coral
DENSITY	1.017 g/ml
salinity	35 ppt
ph	8.0-8.6
Ammonia level	0.0
Nitrite level	0.0
temperature	72 – 80 0F
Oxygen level	high
Kinds of rock/ornaments	Shells, coral
Hardness/level	high

How to do maintenance on your tank

Change 20% of water each month

The purpose of a water change

Remove Toxins

Replace trace minerals

The Nitrogen cycle
